

St Theresa School, Bilthoven, Holland, 2009

Tanalised® Extra treated Siberian Larch

Interesting Facts:

- **Combined primary school, child daycare and community centre located in the Biltse woods**
- **The curving walls of the school have been clad in Siberian Larch, treated with Tanalith E preservative with a water repellent additive, that will not only ensure a long service life for the timbers but will also help maintain its dimensional stability and attractive appearance.**
- **To complement the lightly wooded landscape in which it is located, the rounded shapes of the building depict three logs with the treated cladding representing the bark.**
- **Timbers treated by Foreco Dalfsen.**
