

# Island Lodge, Mozambique

Tanalised treated decking and cladding timbers

Interesting Facts:

- **South African timber used in the development of a getaway lodge in Cova de Tubarao on Mozambique's Macaneta Island.**
- **The decking and cladding of the lodge was manufactured from TANALISED pressure treated timbers, ensuring a long-term protection against decay and insect attack.**
- **The Cova project was challenging given the distances and local conditions involved and the need to preserve the local ecology and restore the dunes and vegetation.**
