

Shaftesbury Primary School, East London

Preservative treated buildings

Interesting Facts:

- **Original building designs by the school's headteacher have produced completely bespoke constructions by PETNE, the project contractors**
- **The wooden amphitheatre provides shelter from the weather for children and parents alike, and the ark is large enough for the children to play inside**
- **Project exclusively used Q-Deck treated timbers from Hoppings Softwood Products, which contain TANALITH Extra with built-in water repellent**
- **A steam chamber was built on site during construction to create the unique curvatures of the ark walls**
